IN THE SPECIFICATION

(A) Please add the following paragraph to be between the 2<sup>nd</sup> and 3<sup>rd</sup> paragraphs of the **DETAILED DESCRIPTION OF THE INVENTION** as the following. The amendment is based on the suggestion in the  
5 office action. No new matter is added.

For a structural described, the integral formed clutch suction disk of  
an air compressor of a vehicle air conditioner comprises an integral formed  
steel cylinder 10 having a recess 10; a bottom disk 20 at a bottom side of  
10 the integral formed cylinder; a through hole 40 being formed in a central  
part of the disk; an outer cylinder 30 enclosing the steel cylinder 10; a  
bottom surface 31 is formed between a lower disk end of the outer cylinder  
30 and an outer wall of the steel cylinder 10; a brake disk C having an  
inner brake cylinder 60 and an outer brake cylinder 70 enclosing the inner  
15 brake cylinder 60; an outer surfaces of the outer brake cylinder 70 having  
threads 71; an annular groove 90 being formed between the inner brake  
cylinder 60 and the outer brake cylinder 70. In assembly, the steel  
cylinder 10 and the outer cylinder 30 are received in the annular groove 90  
and the bottom disk 20 is exposed at an outer side of the annular groove 90.
